Subject: Microsoft Settlement

Please accept the settlement.

Microsoft has always acted in the best interest of the software industry. Their active encouragement of industry-wide standards has made us all winners, even those companies and states now claiming foul, and they have promoted the rise and success of an entire new industry. Even though they had the capability to do so, Microsoft has never acted as a monopoly. They have kept the cost of their systems and programs very reasonable, and by doing so, they made incredibly advanced information processing capabilities available to nearly everyone in our country.

Thank you.
